

ABSTRACT OF THE DISCLOSURE

A binding for a snowboard has: a base plate; a heal
cup; a coupling tool for coupling the base plate and the
5 heal cup through a member for hardness adjustment; a boot
fixing band with one end attached to the one side of the
heal cup; and a belt attached to the other side of the
heal cup so as to be coupled with the band, wherein the
member for hardness adjustment is replaceable by another
10 member with different hardness.
